Here is some code that draws a tomato…

```
void setup() {
  size(500, 500);
}
void draw() {
  background(200, 200, 200);
  noStroke();
  ellipse(150, 200, 150, 150);
  ellipse(212, 200, 150, 150);
  rect(176, 103, 12, 32);
}
```

1. Make the tomato red.
2. Make the stem green.
3. Take a bite out of the tomato.
4. Only bite the tomato when the mouse is pressed
